

#### Accident Reporting System Enhancements

#### INTRODUCTION

A number of enhancements have been made to the Accident recording System. The operation of this new and enhanced functionality is detailed in this document.

#### ATTACHMENTS

When an accident is recorded in the system, related photos, letters or documents etc. can be attached to the accident record. At the foot of the page on the 'Findings' tab a document can be added.

### ADDITIONAL EMAIL RECIPIENTS

When an accident record is created a notification, email is sent to the person entered as the 'Reporting Person' and to Pam Bruce, Ron Wilson and David Robb within the Health and Safety team. A facility to add up to a maximum of 3 additional recipients of this email has been added to the system. On the Accident entry screen below the accident classification new fields exist to enter these email addresses, see overleaf...

The report cannot be printed by clicking the printer icon.

Please note the Notifiable Disease and Violence sections of the Accident are only displayed in the report if any data is entered for these sections.

### INJURY CATEFORY, TYPE AND BODY PART CLASSIFICATION

When entering the details for a Specified or Over 7 days Reportable accident the accident is reported the Health and Safety Executive. In these cases, only specific combinations of Injury Category, Injury Type and Body Part are valid. These values are selected from drop-down lists on the Injury tab, as shown below.

-	Contraction of the second se

To improve usability, when a Specified or Reportable Accident is being entered these lists are populated dynamically with only values that are valid for the parent selection. For example,...

If Injury Category 'Specified injury or condition (see Inury Type) is selected only Injury types specific to this category are available in the Injury type List.

	AND DESCRIPTION OF TAXABLE PARTY AND ADDRESS OF TAXABLE PARTY.

Then selecting a particular Injury Type only body parts specific to that injury type are available in the Part of Body Injured drop-down list. Since these related lists are built dynamically the user can only select a valid combination. These lists and their valid combinations are defined by the Health and safety Executive. There is one point to note however, if a Minor Accident is created and the injury details are entered, if the Accident is then changed to a Specified or Reportable, the injury category, type and body part must be reselected to ensure a valid combination is set.
